

CUSC Code Administrator Consultation Response Proforma**CMP353 'Stabilising the Expansion Constant and non-specific Onshore Expansion Factors from 1st April 2021'**

Industry parties are invited to respond to this consultation expressing their views and supplying the rationale for those views, particularly in respect of any specific questions detailed below.

Please send your responses to cusc.team@nationalgrideso.com by **2pm** on **19 November 2020**. Please note that any responses received after the deadline or sent to a different email address may not receive due consideration by the Panel.

If you have any queries on the content of this consultation, please contact Paul Mullen paul.j.mullen@nationalgrideso.com or cusc.team@nationalgrideso.com.

Respondent details	Please enter your details
Respondent name:	Joseph Dunn
Company name:	ScottishPower Renewables
Email address:	Joseph.dunn@scottishpower.com
Phone number:	07753 624 494

For reference the applicable CUSC objectives are:

- a. *That compliance with the use of system charging methodology facilitates effective competition in the generation and supply of electricity and (so far as is consistent therewith) facilitates competition in the sale, distribution and purchase of electricity;*
- b. *That compliance with the use of system charging methodology results in charges which reflect, as far as is reasonably practicable, the costs (excluding any payments between transmission licensees which are made under and accordance with the STC) incurred by transmission licensees in their transmission businesses and which are compatible with standard licence condition C26 requirements of a connect and manage connection);*
- c. *That, so far as is consistent with sub-paragraphs (a) and (b), the use of system charging methodology, as far as is reasonably practicable, properly takes account of the developments in transmission licensees' transmission businesses;*
- d. *Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency. These are defined within the National Grid Electricity Transmission plc Licence under Standard Condition C10, paragraph 1 *; and*
- e. *Promoting efficiency in the implementation and administration of the use of the system charging methodology.*

**Objective (d) refers specifically to European Regulation 2009/714/EC. Reference to the Agency is to the Agency for the Cooperation of Energy Regulators (ACER).*

Please express your views in the right-hand side of the table below, including your rationale.

Standard Code Administrator Consultation questions		
1	Do you believe that CMP353 Original solution better facilitates the Applicable Objectives?	<p>Overall Yes</p> <p>Against ACO (a): Positive - Use of the current Expansion Constant and Expansion Factors would undoubtedly lead to a detrimental effect in competition between Users due to a significant unexpected change to the locational costs faced by certain Users.</p> <p>Against ACO (b): Neutral</p> <p>Against ACO (c): Positive – Essentially, this mod allows further required work to be completed in this area without applying costs to Generators and Demand that may not ultimately best meet this objective.</p> <p>Against ACO (d): Neutral</p> <p>Against ACO (e): Positive – This is temporary and will lead to a improved efficiency in and understanding of the methodology.</p>
2	Do you support the proposed implementation approach?	Yes
3	Do you have any other comments?	No
