# MRPL TO Licence: Expectations and Approach

With Ofgem's Decision on the 11<sup>th</sup> January to proceed with granting TO licence to MRPL we have certainty on expectations: MRPL shunt reactor to be operational by 1<sup>st</sup> of April, operating via a Transmission Licence

## Proposed approach:

- Until TO licence granted (expectation 1<sup>st</sup> April) continue to commission using CUSC processes (connection agreement)
- Agree on required documentation to convert connection agreement to STC framework (utilise documentation intended for OFTOs such as interface agreement, transmission site schedule and commissioning and compliance processes)
- Facilitate STC accession for MRPL

Given tight timetable we have to work to we propose that some activities are performed in parallel:

Physical commissioning of shunt reactor

STC accession

Agreeing timetable and documents required

# Accession and Party Entry (STC Sec B)

- Party Applicant – Transmission Licensee or OFTO preferred Bidder
- Accession Agreement executed to become a party (limited) to the STC
- Within 30 days of accession each Party and the Party Reps agree the Party Entry Processes (Sec B para 3.2.3)
- STCP 23-1 - Concept of Party Entry Process Timetable created for offshore covering processes, steps, responsibilities and timescales
  - 3 days of accession – Secretary send draft to TO (MRPL)
  - 5 BD TO (MRPL) contact Sec to discuss and agree with other Parties (all sign the timetable) [plan to discuss a STC Panel]
- Secretary notifies Authority once Party Entry Processes complete (Sec B para 3.2.4)

# Potential Future Modifications and impacts of other modifications

**Modifications Tracker – Sally Musaka**

**Authority Update (SCRs/Energy Code Review) – Jonathan Coe**

# Reports from Sub-Committees

**Joint Planning Committee (JPC) – Nicola Bruce**

- **Next meeting: 25 April 2022**

**Network Access Policy Workgroup (NAP) – TBC**

- **Next meeting: TBC**

**Transmission Charging Review Group (TCRG) – Richard Woodward**

- **Next meeting: TBC**
