Code Governance Review (CGR) 2

Headline proposals

Grid Code Review Panel - Sept 2012

Headline CGR2 proposals

CGR2 consultation will focus on industry codes, including Grid Code, that were not captured by the initial CGR proposals in 2010. The proposals will seek to:

• Introduce/increase self governance*
• Introduce Significant Code Reviews to all codes
• Require codes to observe the Principles of the Code Administration Code of Practice
• Require clear reasons to be given for recommendations to the Authority
• Enable Authority to 'send back' modification reports where a deficiency is identified (eg incorrect legal text)

* At this stage we propose to consult on the Grid Code (and D Code) adopting an open governance framework, enabling users to formally raise modifications and giving more weight to the Panel's recommendation on change.

Timings and next steps

- CGR2 consultation – published end Sept

- CGR2 workshop – early Nov

- Consultation closes – end Nov

- Conclusions and statutory consultation on licence modifications (as applicable) – early 2013

- Consequential code modifications made – by mid 2013
