ADE | GC0148: 'Implementation of EU Emergency and Restoration Code Phase II' | 15 May 2023

Context

The ADE is the UK's leading decentralised energy advocate, focused on creating a more cost effective, low-carbon and user-led energy system. The ADE has more than 150 members active across a range of technologies, including both the providers and the users of energy equipment and services. Our members have particular expertise in demand side energy services including demand response and storage, combined heat and power, heat networks and energy efficiency.

Summary

The ADE regrets that it did not respond to the 2nd Code Administrator Consultation Response for GC0148 in time for the deadline. However, we appreciate NGESO's efforts to better engage aggregators following the Authority Send Back. After consulting with members who were involved in the Code Working Group, we are satisfied that an agreeable solution was reached and support the modifications made.
