For reference the Applicable Grid Code Objectives are:

- a) To permit the development, maintenance and operation of an efficient, coordinated and economical system for the transmission of electricity
- b) Facilitating effective competition in the generation and supply of electricity (and without limiting the foregoing, to facilitate the national electricity transmission system being made available to persons authorised to supply or generate electricity on terms which neither prevent nor restrict competition in the supply or generation of electricity);
- c) Subject to sub-paragraphs (i) and (ii), to promote the security and efficiency of the electricity generation, transmission and distribution systems in the national electricity transmission system operator area taken as a whole;

- d) To efficiently discharge the obligations imposed upon the licensee by this license and to comply with the Electricity Regulation and any relevant legally binding decisions of the European Commission and/or the Agency; and
- e) To promote efficiency in the implementation and administration of the Grid Code arrangements

Please express your views in the right-hand side of the table below, including your rationale.

2	Do you have a preferred proposed solution?	<p><input type="checkbox"/> Original <input checked="" type="checkbox"/> WAGCM1 <input type="checkbox"/> No preference</p> <p>We support WAGCM1 as it avoids retrospectivity for existing generators. We believe NGESO have not provided enough evidence in form of system studies and cost benefit analysis for SPR to support NGESO's original proposal of subjecting GC0156 requirements for resilience retrospectively to existing generators.</p>
