

Grid Code Review Panel Member Biography

**Name:**

Darshak Shah

Role:

Generator – Panel Member

Biography:

“I currently working at bp as offshore wind and renewable energy grid integration. For the last 13 years of experience within the electrical power industry, I have a wider and more diverse industry experience providing significant contributions primarily in Network development, Policy development to meet future network requirements, Network Operation, & Compliance requirements within NGESO and NGETO.

I fully acknowledge future challenges to drive Net Zero and the fundamental need for modification requirements within current codes and standards. It is very important to drive the grid code modification effectively to adopt the transition to Net Zero whilst maintaining grid security and reliability. Along with my experience in the power industry, I am a chartered engineer with IET & actively volunteer within IET as a PRA for CEng aspirants.”
