

Date: Saturday 13 Aug 2022

BSUoS Charge Estimate: £5.58/MWh
Total Outturn: £5.00m

Daily Balancing Costs

BM Cost (Indicative)
AS Cost (Estimate)

Commentary

The market was intermittently short in excess of 400MW between midnight and the early afternoon. Then it was short in excess of 600MW from the afternoon until the end of the day. Over the evening peak, multiple trades on the interconnectors were undertaken for positive margin. Some BM actions were taken between midnight and the early morning to buy off wind generation to solve power flow congestions in Scotland.
