## Commentary

The market was mostly long through the day. Some trades were required for margin over the morning peak. There was also a TV pickup of approximately 350MW following the Prime Minister's Covid broadcast.

Constraints were active in the north of England and across Scotland for most of the day with high winds. Up to 4GW of wind bids were required near the Scottish border. RoCoF was managed by trades and BM Actions. Trades and BM Actions were also used for voltage support.
