## Commentary

The market was mostly short before midday and mostly long afterwards. Interconnectors were reducing flow into GB during the morning by up to 1600MW and Trades were made for margin. In the afternoon and evening, wind was above forecast by up to 600MW.

Constraints were active over the English and Scottish border from approximately 2pm with wind over forecast in the north and Scotland. Overnight trades were carried out for RoCoF. A combination of optional contract enactment, trades and BM actions were needed for voltage management.
