BM Cost (Indicative)

AS Cost (Estimate)

## Commentary

The market was short from late morning to the early evening. Interconnector Trades were required for Margin during the mid-afternoon and the evening period, and for Downward Regulation overnight. BM Actions managed thermal export constraints in Scotland and the North of England mainly from the late afternoon onwards. BM Action was required for System Inertia at the start of the day and overnight. Trades and BM Action supported overnight Voltage Control.
