BSUoS Charge Estimate: £8.83/MWh  
Total Outturn: £10.12m

Daily Balancing Costs

BM Cost (Indicative)  
AS Cost (Estimate)

Commentary

Periods of short market in excess of 700MW were recorded in the early morning and in the evening. Between midnight and the morning pick-up multiple trades on the interconnectors were undertaken for downward regulation. Overnight, a mix of trades on generating units and offers accepted in the BM were required to manage the voltage level in England and Wales. Some BM actions were also required for RoCoF.
