# Daily Balancing Costs

BM Cost (Indicative)  
AS Cost (Estimate)

## Commentary

The market started short for the morning but stayed mostly long for the rest of the day. BM Actions were required for magin in the morning and units were very expensive due to low wind generation and plant margins.

Constraints were briefly active in Scotland during the afternoon. Overnight interconnector trades were made for RoCoF. An optional contract enactment and BM actions were required for voltage management.
