

CUSC Alternative Form – Non Charging

CMP434 Alternative Request 9:

Overview: Extend the timeline for implementation

Proposer: ABO Energy

☒ I/We confirm that this Alternative Request proposes to modify the non - charging section of the CUSC only

What is the proposed alternative solution?

The timeline between the decision date on 13 December 2024 and implementation on 1 January 2025 is unrealistic, it does not take consideration of the winter break nor allow for delay in decision on changes or amendments prior to implementation. Propose delaying implementation to start Q2 2025 at a minimum.

What is the difference between this and the Original Proposal?

Moves out the implementation date of proposed changes.

What is the impact of this change?

Proposer's Assessment against CUSC Non-Charging Objectives	
Relevant Objective	Identified impact
(a) The efficient discharge by the Licensee of the obligations imposed on it by the Act and the Transmission Licence;	Positive: Gives more realistic amount of time to implement changes
(b) Facilitating effective competition in the generation and supply of electricity, and (so far as consistent therewith) facilitating such competition in the sale, distribution and purchase of electricity;	None
(c) Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency *; and	None
(d) Promoting efficiency in the implementation and administration of the CUSC arrangements.	Positive: Gives more realistic amount of time to adapt to and implement changes
<p>*The Electricity Regulation referred to in objective (c) is Regulation (EU) 2019/943 of the European Parliament and of the Council of 5 June 2019 on the internal market for electricity (recast) as it has effect immediately before IP completion day as read with the modifications set out in the SI 2020/1006.</p>	

When will this change take place?

Implementation date:

Q2 2025 at a minimum

Implementation approach:

As per Original
