## Code Administrator Consultation Response Proforma

### GC0164: Simplification of operating Code No.2

Industry parties are invited to respond to this consultation expressing their views and supplying the rationale for those views, particularly in respect of any specific questions detailed below.

Please send your responses to [grid.code@neso.energy](mailto:grid.code@neso.energy) by **5pm** on **27 March 2025**. Please note that any responses received after the deadline or sent to a different email address may not receive due consideration.

If you have any queries on the content of this consultation, please contact [grid.code@neso.energy](mailto:grid.code@neso.energy)

Respondent details	Please enter your details	
<b>Respondent name:</b>	Stuart McLarnon	
<b>Company name:</b>	NESO	
<b>Email address:</b>	Stuart.mclarnon@neso.energy	
<b>Phone number:</b>	07596 579914	
<b>Which best describes your organisation?</b>	<input type="checkbox"/> Consumer body <input type="checkbox"/> Demand <input type="checkbox"/> Distribution Network Operator <input type="checkbox"/> Generator <input type="checkbox"/> Industry body <input type="checkbox"/> Interconnector	<input type="checkbox"/> Storage <input type="checkbox"/> Supplier <input checked="" type="checkbox"/> System Operator <input type="checkbox"/> Transmission Owner <input type="checkbox"/> Virtual Lead Party <input type="checkbox"/> Other

--------------------------------	--

Public

	<input type="checkbox"/> <b>Confidential</b> (this will be disclosed to the Authority in full but, unless specified, <u>will not be shared</u> with the Panel or the industry for further consideration)
--	--

**For reference the Applicable Grid Code Objectives are:**

- i. To permit the development, maintenance and operation of an efficient, coordinated and economical system for the transmission of electricity
- ii. Facilitating effective competition in the generation and supply of electricity (and without limiting the foregoing, to facilitate the national electricity transmission system being made available to persons authorised to supply or generate electricity on terms which neither prevent nor restrict competition in the supply or generation of electricity);
- iii. Subject to sub-paragraphs\* (i) and (ii), to promote the security and efficiency of the electricity generation, transmission and distribution systems in the national electricity transmission system operator area taken as a whole;
- iv. To efficiently discharge the obligations imposed upon the licensee by this license\* and to comply with the Electricity Regulation and any relevant legally binding decisions of the European Commission and/or the Agency; and
- v. To promote efficiency in the implementation and administration of the Grid Code arrangements

\* See Electricity System Operator Licence

\*\*The Electricity Regulation referred to in objective (iii) is Regulation (EU) 2019/943 of the European Parliament and of the Council of 5 June 2019 on the

## Public

*internal market for electricity (recast) as it has effect immediately before IP completion day as read with the modifications set out in the SI 2020/1006.*

### **For reference, (for consultation questions 5 & 6) the Electricity Balancing Regulation (EBR) Article 3 Objectives and regulatory aspects are:**

- a) fostering effective competition, non-discrimination and transparency in balancing markets;*
- b) enhancing efficiency of balancing as well as efficiency of national balancing markets;*
- c) integrating balancing markets and promoting the possibilities for exchanges of balancing services while contributing to operational security;*
- d) contributing to the efficient long-term operation and development of the electricity transmission system and electricity sector while facilitating the efficient and consistent functioning of day-ahead, intraday and balancing markets;*
- e) ensuring that the procurement of balancing services is fair, objective, transparent and market-based, avoids undue barriers to entry for new entrants, fosters the liquidity of balancing markets while preventing undue market distortions;*
- f) facilitating the participation of demand response including aggregation facilities and energy storage while ensuring they compete with other balancing services at a level playing field and, where necessary, act independently when serving a single demand facility;*
- g) facilitating the participation of renewable energy sources and supporting the achievement of any target specified in an enactment for the share of energy from renewable sources.*

Public

### What is the EBR?

*The Electricity Balancing Regulation (EBR) is a European Network Code introduced by the Third Energy Package European legislation in late 2017.*

*The EBR regulation lays down the rules for the integration of balancing markets in Europe, with the objectives of enhancing Europe's security of supply. The EBR aims to do this through harmonisation of electricity balancing rules and facilitating the exchange of balancing resources between European Transmission System Operators (TSOs). Article 18 of the EBR states that TSOs such as the NESO should have terms and conditions developed for balancing services, which are submitted and approved by Ofgem.*

**Please express your views in the right-hand side of the table below, including your rationale.**

### Standard Code Administrator Consultation questions

1	Please provide your assessment for the proposed solution against the Applicable Objectives against the current baseline?	Mark the Objectives which you believe the proposed solution better facilitates than the current baseline:	
		Original	<input checked="" type="checkbox"/> i <input type="checkbox"/> ii <input checked="" type="checkbox"/> iii <input type="checkbox"/> iv <input checked="" type="checkbox"/> v  <input type="checkbox"/> None
		We agree that the proposal better facilities Grid Code Objectives i, iii and v on the basis that this modification seeks to simplify and rationalise the Grid Code drafting in respect of OC2 and we also understand this approach will be applied to other sections of the Grid Code.	

## Public

		<p>We understand that the aim of the modification is to use plain English, reduce duplication, aid navigation and improve the Grid Code for end Users. In this respect, we see the Grid Code becoming more efficient and therefore are of the opinion that this proposal is positive in respect of Grid Code objectives i, iii and v.</p>
2	Do you have a preferred proposed solution?	<p><input checked="" type="checkbox"/>Original</p> <p><input type="checkbox"/>Baseline</p> <p><input type="checkbox"/>No preference</p>
3	Do you support the proposed implementation approach?	<p><input checked="" type="checkbox"/>Yes</p> <p><input type="checkbox"/>No</p> <p>We support the revised text with the additional use of flow diagrams which we believe will reduce the time required for navigation.</p>
4	Do you have any other comments?	<p>Simplifying and rationalising OC2 of the Grid Code indicates that if codes are written and structured with the user in mind, with due regard to accessible language, the use of flow diagrams and are principle based, ease of access can be improved for the end User.</p> <p>This work ensured that the proposed text did not change any of the existing obligations but has also highlighted the significant challenge that</p>

## Public

		<p>some stakeholders prefer absolute legal certainty of drafting while others prefer ease of assimilation.</p> <p>A comprehensive definitions review could be needed to aid code simplification.</p>
5	Do you agree with the Workgroup's assessment that the modification does impact the Electricity Balancing Regulation (EBR) Article 18 terms and conditions held within the Code?	<p><input checked="" type="checkbox"/> Yes</p> <p><input type="checkbox"/> No</p>
		Click or tap here to enter text.
6	Do you have any comments on the impact of the modification on the EBR Objectives?	<p><input type="checkbox"/> Yes</p> <p><input checked="" type="checkbox"/> No</p>
		Click or tap here to enter text.
