# Headline Report 15 May 2025

The Headline Report is produced after every Panel and aims to provide an overview of the key decisions made. Minutes for this meeting will be published separately.

## Draft Final Modification Report

The following Draft Final Modification Report was presented to the Panel:

### **CMP432 ‘Improve “Locational Onshore Security Factor” for TNUoS Wider Tariffs’**

This modification seeks to improve the cost reflectivity of the “Locational Onshore Security Factor” used in calculating Wider TNUoS tariffs, in order for charges to better reflect the way Transmission Owners plan for a secure future network based on the Security and Quality of Supply Standard requirements.

Ahead of the vote taking place, the Panel considered the legal text amendments proposed as part of the Code Administrator Consultation and agreed that they were typographical. The Panel recommended by majority that the Original does not better facilitate the Applicable CUSC Objectives. The Final Modification Report was sent to the Authority on 15 May 2025.

CMP432 documentation can be found [here](#)
