Headline Report 09 June 2025

The Headline Report is produced after every Panel and aims to provide an overview of the key decisions made. Minutes for this meeting will be published separately.

Workgroup Reports

The following Workgroup Report was presented to the Panel:

CMP448: Introducing a Progression Commitment Fee to the Gate 2 Connections Queue

This proposal establishes a framework to introduce an additional financial requirement on developers, that can be activated if required, to incentivise the timely removal of unviable projects from the connections queue and facilitate the more timely and efficient connection of viable projects. In doing so it will support progress towards clean power by 2030 ("CP30") and net zero targets.

The Panel agreed that the Terms of Reference have been met and agreed for CMP448 to proceed to Code Administrator Consultation. The Code Administrator Consultation will be published on 10 June 2025, and this will close on 24 June 2025.

CMP448 documentation can be found [here](#)

Change of Governance – Urgency Request

CMP447: Removal of designated strategic works from cancellation charges/securitisation

This modification seeks to adjust the fixed Attributable Works of relevant Generators where CMP447 would have benefited them had they not fixed (by removing the relevant element of their fix, the rest of the fix remaining as an intact fix). The principle otherwise remains undisturbed that fixing of Attributable Works is permanent and irreversible.

The Proposer requested a title change to the modification proposal, the original modification title was 'Follow on modification to CMP428' and the Panel unanimously agreed this to be changed to 'Removal of designated strategic works from cancellation charges/securitisation'.

Public

The Panel unanimously agreed that CMP447 met the Authority's Urgency criteria (a) and therefore recommended urgent treatment. Panel's recommendation was sent on 09 June 2025 seeking an Authority decision by 5pm on 13 June 2025.

CMP447 documentation can be found [here](#)
