

Date: Thursday 22 May 2025

BSUoS Final Tariff: £10.74/MWh

Total Outturn: £5.95m

Daily Balancing Costs

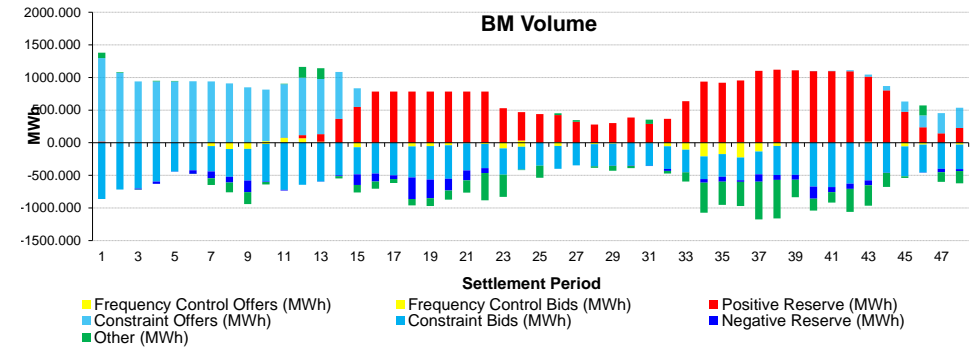

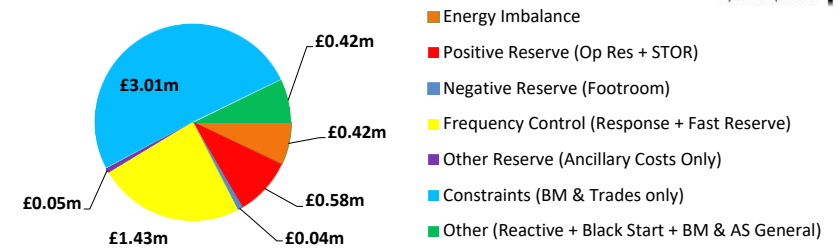

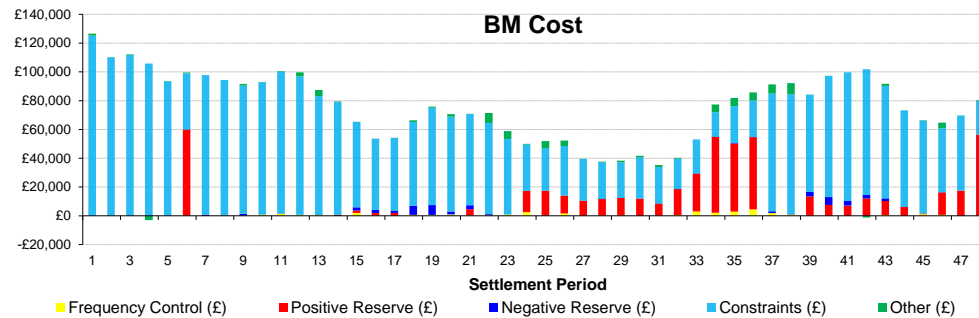

BM Cost (Indicative)

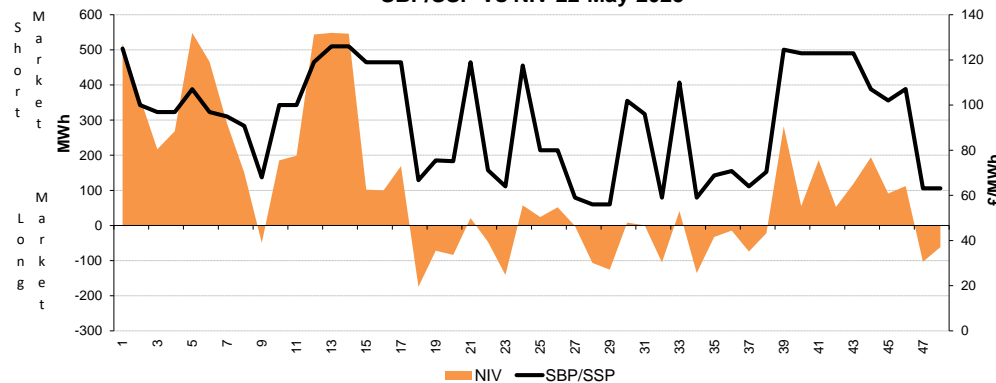

AS Cost (Estimate)

£1.86m

£4.09m

SBP/SSP Vs NIV 22-May-2025

Commentary

The market alternated between long and short during daytime and was predominantly short for the rest of the period. No trades were taken for Margin or Downward Regulation. BM Actions were required to manage thermal constraints in Scotland during the early periods and later in the day, as well as in England throughout the day. Trades and BM Actions supported Voltage Control and further BM Actions supported System Inertia.
