Grid Code Review Panel Headline Report

17 July 2025

The Headline Report is produced after every Panel and aims to provide an overview of the key decisions made. Minutes for this meeting will be published separately.

New Modifications

The following new Modification Proposal was presented to the Panel:

GC0183: Generator and Interconnector Availability During a Severe Space Weather Event

This modification will make changes to the Grid Code to obligate Generators and Interconnectors to notify NESO of their intended position in the event of severe space weather.

The Panel unanimously agreed that GC0183 met the Authority’s Urgency criteria (b) and therefore recommended urgent treatment. Panel’s recommendation was sent on 17 July 2025 seeking an Authority decision by 5pm on 29 July 2025.

The Panel recommended that GC0183 should proceed to a Workgroup. The Panel did not approve the Terms of Reference for the Workgroup.

GC0183 documentation can be found [here](#)

Prioritisation Stack

The Panel discussed the prioritisation of the following Modifications:

Modification	Panel Comments	Position in Prioritisation Stack
GC0183: Generator and Interconnector Availability During a Severe Space Weather Event	Due to recommending urgency, the Panel agreed that GC0183 should be placed at priority 1.	1

The latest prioritisation stack can be found [here](#)
