Code Administrator Meeting

Summary

Workgroup Meeting 6: CM097 – Electromagnetic Transient (EMT) and Root Mean Square (RMS) Model Submission for Transmission Owners (TOs)

Date: 17 July 2025

Contact Details

Chair: Matthew Larreta, matthew.larreta@neso.energy

Proposer : Frank Kasibante, frank.kasibantel@neso.energy

Key areas of discussion

The aim of Workgroup 6 was to clarify quoracy of STC Workgroup meetings and voting, review the Action Log and draft Workgroup Report, and to discuss an Alternative Request.

Workgroup Quoracy

The Chair explained that Workgroup quoracy requires a NESO representative and at least two Workgroup members representing an STC Party. Members were reminded that SSEN's STC Party status is pending confirmation due to an issue on their nomination form; once confirmed, they will be included for quoracy.

Voting

At Workgroup meeting 5, the Chair clarified that voting eligibility requires members (STC Party and non-STC Party) to have at least 50% attendance at the time of the vote. A member had asked where this is found in guidance, the Chair confirmed these rules are in the Terms of Reference, as agreed by the STC Panel. The Workgroup member was satisfied with this clarification.

Actions review

Action 11 – Action closed (more general discussions with Ofgem to be taken forward)

A Workgroup member pointed out that this Action relates to a general issue with Ofgem regarding cost recovery for several projects, including the EMT model. The Workgroup

Public

member stated that their regulation team is seeking a meeting with Ofgem to discuss this issue more broadly. NESO representatives mentioned that they are engaged in ongoing discussions with Ofgem to find a resolution. The Workgroup agreed to reflect these discussions in their report and close this action.

Action 18 – Action closed

The Chair confirmed the minimum attendance requirements for the Workgroup Vote are contained within the Terms of Reference and shared the document with Workgroup members.

Action 19 – Action closed

The Chair confirmed a request has been sent for SSEN to confirm their STC Party status, which is still pending.

Action 20 – Action closed

It was suggested to add the EMT Guidance as an appendix to SCTP 12-2, under STCP governance. NESO agreed after discussing with SMEs, and confirmed any changes will follow existing procedures.

Alternate Request Discussion

The Proposer of the Alternative Request enquired about the procedure for progressing their Alternative. The Chair explained the process, recommended that concerns raised during Workgroup Meeting 5 be addressed prior to voting, and advised the Workgroup member to prepare a presentation addressing those concerns for Workgroup 7. After the presentation, Workgroup members will then proceed to vote on the Alternative.

Draft Workgroup Report

The Chair guided the Workgroup through the comments and amendments provided by Workgroup members in the Draft Workgroup Report, shared on the NESO Collaboration Space. Workgroup members worked collaboratively to revise and update the text, acknowledging that additional drafting will be required during subsequent meetings. Due to access issues with the Collaboration Space, the Chair agreed to distribute an offline version of the Draft Workgroup Report.

Public

Timeline

The Chair noted that Workgroups 7 and 8 have not yet been scheduled. A poll will be distributed to confirm suitable dates.

Next Steps

The Alternative Proposer will address the concerns raised in the previous Workgroup meeting, while the Chair will circulate the draft Workgroup Report and distribute a poll to determine dates for Workgroups 7 and 8.
