

Date: Saturday 28 Jun 2025

BSUoS Final Tariff: £10.74/MWh

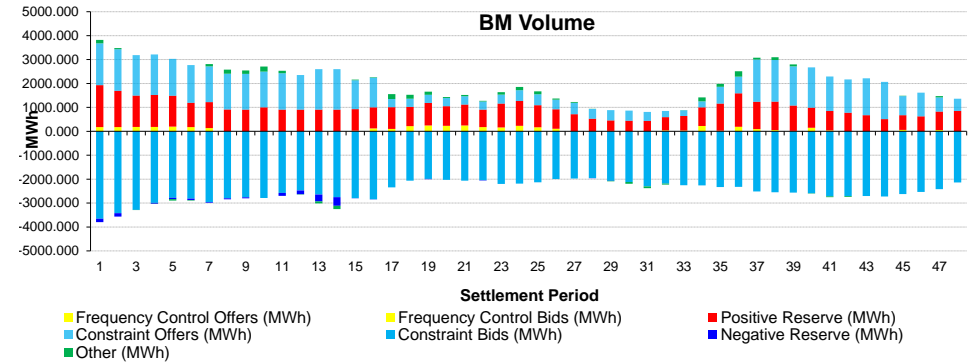

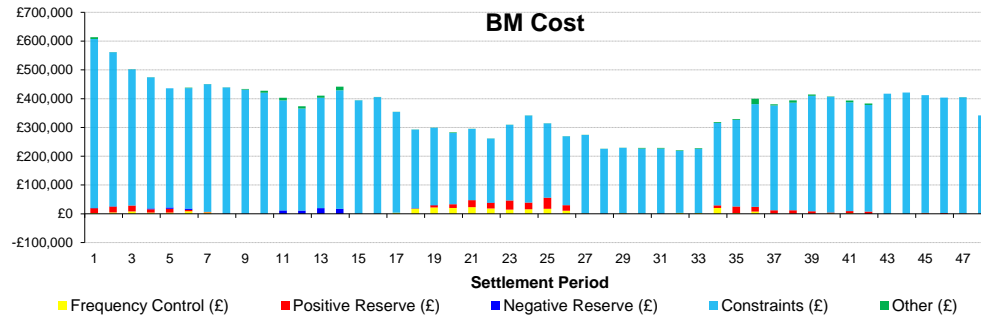

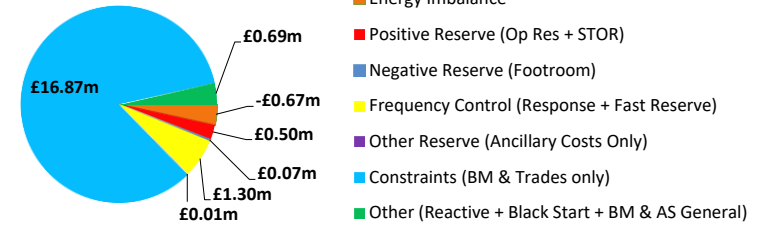

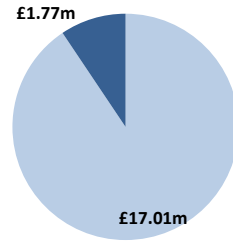

Total Outturn: £18.78m

Daily Balancing Costs

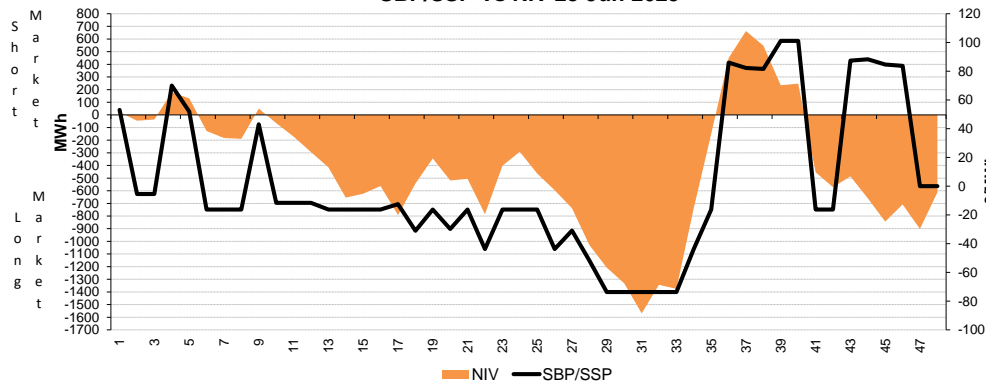

BM Cost (Indicative)

AS Cost (Estimate)

SBP/SSP Vs NIV 28-Jun-2025

Commentary

The market was long for most of the day, except for a few settlement periods in the very early morning and between 17:30-20:00 in the evening. No trades were taken for Margin or Downward Regulation. Trades and BM Actions were required to manage thermal constraints in Southern England throughout the day, while further BM Actions were also managing thermal constraints in Scotland/Northern England. Trades and BM Actions supported Voltage Control. BM Actions also supported System Inertia.
