# Special CUSC Panel Headline Report

## 14 August 2025

The Headline Report is produced after every Panel and aims to provide an overview of the key decisions made. Minutes for this meeting will be published separately.

### New Modifications

The following new Modification Proposals were presented to the Panel:

#### **CMP458 'Prorating of transmission residual demand charges'**

This proposal seeks to change the way TNUoS Demand Residual is billed and enable customers that consume for part of a year, to pay demand residual charges for only that part.

The Panel agreed they were unable to consider the request for Urgency until further clarification on the charging methodology from NESO is provided.

**CMP458** documentation can be found [here](#)

#### **CMP459 'Charging TNUoS on a monthly basis'**

This proposal seeks to change charging TNUoS on a monthly basis rather than the current annual basis.

The Panel by majority agreed that CMP459 has substantially the same effect as Pending CUSC Modification Proposal [CMP445](#) and directed the Code Administrator to reject the Proposal under CUSC clause 8.16.6.

**CMP459** documentation can be found [here](#)

### Key Activities ahead of next panel

Modification Proposal Deadline for August Panel: 15 August 2025

Papers Day: 26 August 2025
