CUSC Panel Headline Report

19 September 2025

The Headline Report is produced after every Panel and aims to provide an overview of the key decisions made. Minutes for this meeting will be published separately.

Workgroup Reports

The following Workgroup Report was presented to the Panel:

CMP447 'Removal of designated strategic works from cancellation charges/securitisation'

This proposal extends the effect of CMP428 in relation to works designated by the Authority, so that Users are not providing unnecessary securities in relation to works that may be independent of their connection, removing a barrier to entry for new generation. The modification also aims to adjust the fixed Attributable Works of relevant Generators by removing the relevant element of their fix, while keeping the rest of the fix intact.

The Panel agreed that the Terms of Reference have been met and agreed for CMP447 to proceed to Code Administrator Consultation. The Code Administrator Consultation will be published on 19 September 2025, and this will close on 03 October 2025.

CMP447 documentation can be found [here](#)
