CUSC Panel Headline Report

21 November 2025

The Headline Report is produced after every Panel and aims to provide an overview of the key decisions made. Minutes for this meeting will be published separately.

New Modifications

The following new Modification Proposal was presented to the Panel:

CMP465: Construction Progression Milestones (M5–M8) Neutrality

This modification aims to deal with the extension given on the G2tWQ Connections offers until 2026 (from the end of 2025) and give affected Users the option to be placed back to the position they would have been (in terms of M5–M8 milestones only) had this extension not occurred.

The Panel by majority agreed that CMP465 met the Authority’s Urgency criteria (a) and (c) and therefore recommended urgent treatment. Panel’s recommendation was sent on 21 November 2025 seeking an Authority decision by 5pm on 26 November 2025.

The Panel recommended that CMP465 proceed to Code Administrator Consultation.
