Headline Report March 2026

The Headline Report is produced after every Panel and aims to provide an overview of the key decisions made. Minutes for this meeting will be published separately.

Approval of Panel Minutes

The meeting minutes from the Panel on 05 December 2026 were approved subject to minor comments incorporated prior to the Panel. These have been uploaded to our [website](#).

New Modifications

The following new Modification Proposals were presented to the Panel:

GSR036: System Access Reform: Review of the voltage limits

This modification aims to review the voltage limits applicable to operational timescales and the potential for provision of some flexibility around them.

GSR036 was re-presented to the Panel with an updated Impact Assessment. This included operational case studies illustrating benefits and minor impacts of the voltage limit change, including improved outage scheduling and demand security. The Panel agreed that further refinement is required before the modification can return for approval. The Proposer will address the additional comments received and bring the revised Proposal to the next Panel meeting.

GSR036 documentation can be found [here](#)

GSR037: Formatting and Housekeeping

This modification aims to make the SQSS a more readable, user-friendly document.

GSR037 was presented to the Panel, with an update on the need for housekeeping and formatting the modification, proposing a range of non-substantive changes to improve the clarity, consistency and usability of the SQSS. The Proposer suggested holding a workshop for interested Panel members to review the changes, address any concerns and avoid the need for a formal Workgroup or multiple consultations.

Public

The Panel agreed that the modification should proceed to Code Administrator Consultation without establishing a formal Workgroup.

GSR037 documentation can be found [here](#)

New / Pending Authority Decisions

Decisions since the last Panel

GSR034: Review of Loss of Power Infeed Risk for Offshore DC Converter

Modification	Decision	Implementation Date
GSR034: Review of Loss of Power Infeed Risk for Offshore DC Converter	03 March 2026	13 March 2026

In flight Modifications

GSR035: System Access Reform – Changes to Enable Beneficial Outages Without Compromising System Security

The Panel approved the Terms of Reference, however, they noted that ToR c) is not necessary and should be removed.

The next [Modification Tracker](#) will be published on 07 April 2026.

Workgroup Reports

No Workgroup Reports were presented to the Panel.

Draft Final Modification Reports

No Draft Final Modification Reports presented to the Panel.

FRCR 2025 – Supplementary evidence

The Panel discussed the submission of supplementary evidence to support FRCR 2025, including arrangements for Panel review, voting and governance. Suggestion that additional material detailing input data, model parameters and conservative assumptions will be submitted to the Authority and shared with the Panel to provide further assurance.

Public

The Panel agreed that a special Panel meeting will be held in late April to allow sufficient time for review and to facilitate formal voting on the supplementary information.

Key Activities ahead of next panel

- Panel members to review GSR036 documentation.
- Special April Panel to be arranged.
