# CUSC Panel Headline Report

## 22 May 2026

The Headline Report is produced after every Panel and aims to provide an overview of the key decisions made. Minutes for this meeting will be published separately.

### Approval of Panel Minutes

The meeting minutes from the Panel meetings held on 21 April and 24 April 2026 were approved and these have been uploaded to our website.

### NESO update on Energy Code Reform

NESO strongly supports the objectives of Energy Code Reform and its role in delivering a simpler, more agile regulatory framework for a rapidly changing energy system.

NESO have considered the Code Manager role for the Electricity Commercial Code and Gas Network Code under Phase 2 and decided not to submit an expression of interest.

The Phase 2 Code Manager role would represent a further significant new undertaking, distinct from our existing code responsibilities. While NESO have the capability to deliver the role, NESO is already taking on a number of new and expanding responsibilities as part of becoming the independent system operator, particularly in whole-system planning and advisory functions.

NESO remains fully committed to supporting a successful phase 2 transition and will continue to work closely with Ofgem to support the wider programme, including the Phase 3 expression of interest process when it opens.

### New Modifications

The following new Modification Proposals were presented to the Panel:

#### **CMP476: Correction to Section 15 of the CUSC**

This modification corrects an unintended inconsistency in how the Global Asset Re-Use Factor is described in Section 15 of the CUSC compared how it is described in associated documents and applied in practice.

## Public

The Panel unanimously agreed that CMP476 should follow the Self-Governance route and proceed Code Administrator Consultation.
