**For reference the Applicable CUSC (non-charging) Objectives are:**

- i. *The efficient discharge by the Licensee of the obligations imposed on it by the Act and by this licence\*;*
- ii. *Facilitating effective competition in the generation and supply of electricity, and (so far as consistent therewith) facilitating such competition in the sale, distribution and purchase of electricity;*
- iii. *Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency \*\*; and*
- iv. *Promoting efficiency in the implementation and administration of the CUSC arrangements.*

\* See Electricity System Operator Licence

\*\*The Electricity Regulation referred to in objective (iii) is Regulation (EU) 2019/943 of the European Parliament and of the Council of 5 June 2019 on the internal market for electricity (recast) as it has effect immediately before IP completion day as read with the modifications set out in the SI 2020/1006.

**For reference, (for consultation questions 5) the Electricity Balancing Regulation (EBR) Article 3 Objectives and regulatory aspects are:**

- a) *fostering effective competition, non-discrimination and transparency in balancing markets;*

## Public

- b) enhancing efficiency of balancing as well as efficiency of national balancing markets;*
- c) integrating balancing markets and promoting the possibilities for exchanges of balancing services while contributing to operational security;*
- d) contributing to the efficient long-term operation and development of the electricity transmission system and electricity sector while facilitating the efficient and consistent functioning of day-ahead, intraday and balancing markets;*
- e) ensuring that the procurement of balancing services is fair, objective, transparent and market-based, avoids undue barriers to entry for new entrants, fosters the liquidity of balancing markets while preventing undue market distortions;*
- f) facilitating the participation of demand response including aggregation facilities and energy storage while ensuring they compete with other balancing services at a level playing field and, where necessary, act independently when serving a single demand facility;*
- g) facilitating the participation of renewable energy sources and supporting the achievement of any target specified in an enactment for the share of energy from renewable sources.*

### What is the EBR?

The Electricity Balancing Regulation (EBR) is a European Network Code introduced by the Third Energy Package European legislation in late 2017.

The EBR regulation lays down the rules for the integration of balancing markets in Europe, with the objectives of enhancing Europe's security of supply. The EBR aims to do this through harmonisation of electricity balancing rules and facilitating the exchange of balancing resources between European Transmission System Operators (TSOs). Article 18 of the EBR states that TSOs such as the NESO should have terms and conditions developed for balancing services, which are submitted and approved by Ofgem.

Standard Code Administrator Consultation questions				
1	Please provide your assessment for the proposed solution against the Applicable Objectives against the current baseline.	<p>Mark the Objectives which you believe the proposed solution better facilitates than the current baseline:</p> <table border="1"> <tr> <td>Original</td> <td> <input checked="" type="checkbox"/> i   <input checked="" type="checkbox"/> ii   <input type="checkbox"/> iii   <input type="checkbox"/> iv  <input type="checkbox"/> None </td> </tr> </table> <p>We agree with the proposer that the claims process should be extended by an extra year. This should have a positive impact on relevant objective (i) in it will provide additional assurance to the licensee that the ESRS can be satisfied and discharged. We also consider there is a positive impact on relevant objective (ii) as the change will enable parties to recover appropriate costs to satisfy the ESRS obligations where they do not have a specific restoration contract with NESO.</p>	Original	<input checked="" type="checkbox"/> i <input checked="" type="checkbox"/> ii <input type="checkbox"/> iii <input type="checkbox"/> iv <input type="checkbox"/> None
