Action Log

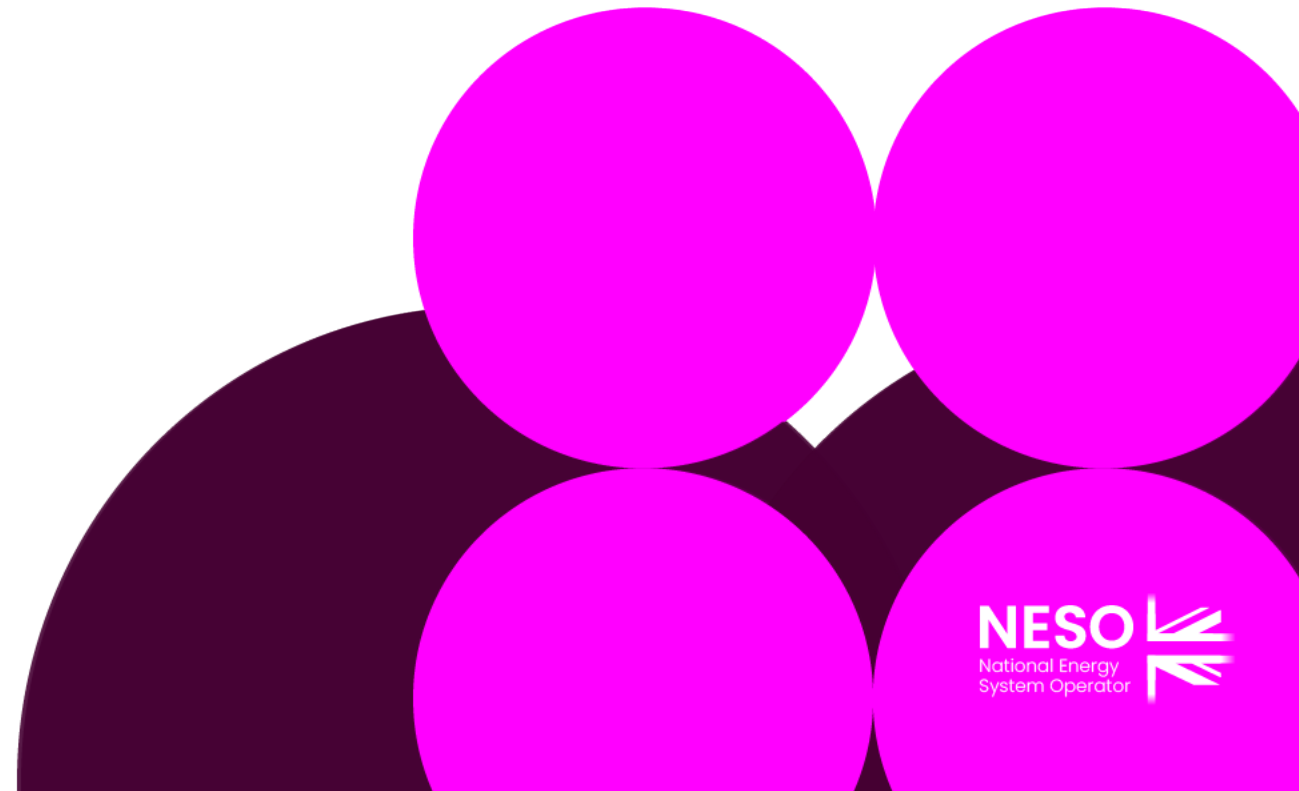

Ren Walker – NESO Code Administrator

Action number	Workgroup Raised	Owner	Action	Comment	Due by	Status
22	WG4	RW	Arrange Meeting with Proposer and follow-up on consequential modification timelines / packaging: understand when consequential mods (e.g., OC2 / SDCP) need to be raised and how timelines/panels align, to support submitting a coordinated package to Ofgem.	20.05.26 Related modifications for the other codes have not yet been raised, although there has already been some discussion on this point. The Workgroup agreed to revisit it at the end of the meeting. To return to this action once the related modifications for the other codes have been raised. 03.06.26 The action remains open, the Workgroup to review and finalised the approach to consequential modifications, including whether they should be raised and submitted as a package, the timing of the Grid Code modification, and how this aligns with the overall delivery timeline.	WG5	Open
27	WG6	DN/SB	03.06.26 Consider whether the Grid Code modifications should be raised in June/July to support the aim of getting the consequential modification to Ofgem in time for consideration alongside the main modification.		WG7	Open
28	WG6	DN/ML	03.06.26 To review and provide a clearer drafting of Appendix K to improve clarity for escalation route provisions, where agreement is not reached.		WG7	Open
29	WG6	DN/LW	To consider whether the Workgroup Consultation should explicitly ask for views on the agreement/veto/disagreement point. Suggestion made that this could be included in the Consultation as a "question" to gather wider industry views.		WG7	Open

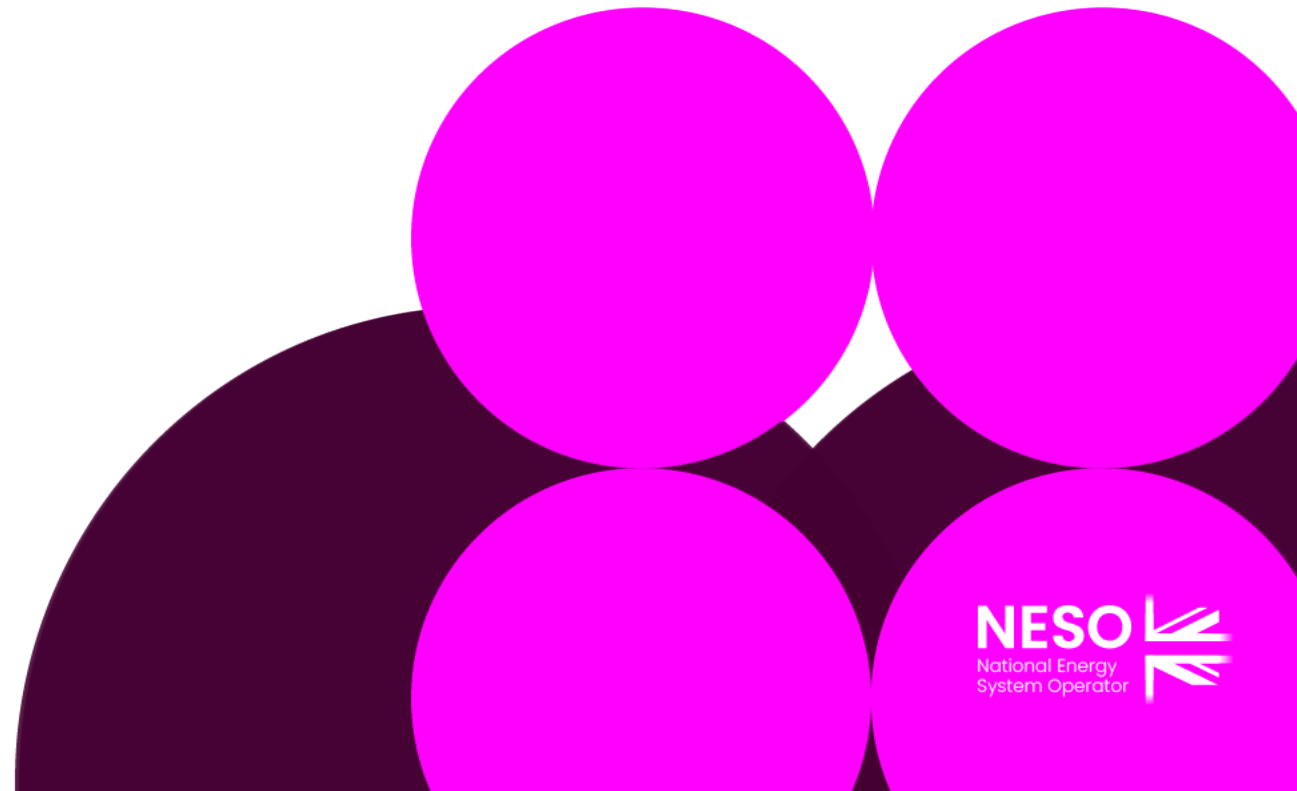

Review Appendix K
