September 2026

Invitation to Qualify Notification: Mid-term Reactive Power Market, Network Services

Following the Pre-Market Consultation held earlier this year in January 2026, NESO are pleased to announce the launch of the Mid-term Reactive Power Market, which will be facilitated using the new iValua Supplier Platform.

The Mid-term Reactive Power Market (MTR for short) is being launched to allow NESO to procure reactive power services across Great Britain closer to real time on a 'mid-term' basis. This market will be in place until April 2032, unless otherwise extended.

To be considered for the provision of reactive power services as part of this Mid-term market, bidders must first become a qualified provider by submitting a full and compliant Qualification Submission in response to and in accordance with this Invitation to Qualify.

Publication of Qualification Pack Documents

This letter is accompanied by several other documents which together comprise the Qualification Pack. Please refer to the table below and review the associated documents for further details.

Document	Overview
Instructions to Tenderers	This document sets out key information and rules in relation to the Mid-term Reactive Power Market. This should be read in conjunction with the Market Qualification Criteria in particular. This document will be published on both iValua and the NESO website.
Market Qualification Criteria	This document sets out the assessment methodology that NESO will follow to determine whether market participants and their assets qualify to be part of the Mid-term Reactive Power market. Market participants should take time to review this document in detail to understand how qualification submissions are going to be assessed. This document will be published on both iValua and the NESO website.
Query Log	This document should be used by Bidders to submit any queries related to the qualification process to NESO. Please refer to the Instructions to Tenderers for more

	information on the query process for this Mid-term Reactive Power Market. This document has only been made available on the iValua platform.
Eligibility Criteria	This document sets out the eligibility criteria for the Mid-term Reactive Power Market. This document will be published on both iValua and the NESO website.
Qualification Technical Specification	The qualification technical specification outlines the baseline technical performance requirements for the voltage service in this Mid-term Reactive Power Market. The specification is written on a technology-neutral basis to ensure that a variety of technology types can participate. This document will be published on both iValua and the NESO website.
Contract Terms & Conditions	We have provided a zip-file which includes various documents. Together these documents make up the Mid-term Reactive Power Market Services Agreement. This document has only been made available on the iValua platform.
Indicative Payment Calculator	NESO have provided an Excel document that sets out an illustrative calculator tool, allowing bidders to test how the payment mechanism in the contract may apply. This document has only been made available on the iValua platform. Please note: In the case of any discrepancy to the formulae in the terms and conditions, please notify us as soon as possible and note that the formulae in the terms and conditions take precedence.
Submission Documents	Bidders are asked to complete various submission proformas as part of their qualification submission. These documents have only been made available on the iValua platform.

Next Steps

Any bidders who wish to qualify for this market are invited to refer to the Mid-term Reactive Power Market event on the iValua Platform for more details and further access to documents, before making their qualification submission via the iValua Platform.

IValua Information

For more information about iValua, please refer to the guidance available on this webpage [Suppliers | National Energy System Operator](#)

For any additional support, a helpdesk is available as detailed below:

Ivalua Supplier Helpdesk (Monday–Friday, 7am–5pm)

- Email: support-neso@ivalua.com
- Phone: +44 207 660 4276

Bidders should note that whilst NESO are making a portion of these documents available on the NESO website for transparency purposes, the Mid-term Reactive Power Market will be hosted on the iValua platform.

Should you have any questions please contact NESO either via the Ivalua Platform or failing that by emailing box.voltage@neso.energy.

Yours sincerely

NESO Procurement Team
